

Cloud Server

Deploy fixed price server solutions on Microsoft Azure in seconds.

Whether you are looking to move an existing on-premise server to the cloud or you are building new solutions, the Cloud Server solution offers the power and reliability of Azure at fixed prices, perfect for SMBs. Remove the complexity of Azure

pay-as-you-go billing and turn to Affinity Smart Cloud Server's fixed cost server solution.

Key features of Cloud Server:

Choose the size you need

Select the Cloud Server based on the CPU, RAM, storage, and operating system requirements.

Optional VPN and backup

For added security and peace of mind, you can add a secure VPN and data backup.

Data transfer included

All Vuzion Cloud Servers include data transfer and a static IP address.

Secure and compliant

Benefit from Microsoft's more than \$1bn a year investment in IT security and more compliance certifications than any other cloud provider.

Fixed monthly cost

Azure is a pay as you go service however, with Vuzion Cloud Server, you are buying a server at a fixed cost with no hidden surprises

Delivered in the UK

Hosted in Microsoft's UK datacentres, with 3 copies of the data stored locally for added resilience.

Cloud Server solution makes it easy to move out-of-support or inflexible on-premise servers to the cloud.

- **Increased security** - with support for Windows Server 2008 at an end, moving to a Cloud Server provides a modern solution that is fully supported.
- **Enable remote access** - a Cloud Server can be easily accessed from anywhere, freeing users from the office network.
- **Predictable operating expenses** - replace the capital cost of replacing legacy servers with a fixed monthly operating expense.
