

Datto Cloud Continuity for PCs

Eliminate data loss and help get your employees back up and running quickly with Datto Cloud Continuity for PCs. This reliable, image-based, all-in-one BCDR solution provides cloud backup, screenshot verification, restore and virtualisation of the entire PC, including files and data stored locally. In the event of a lost or stolen PC, ransomware attack, or other disaster, WE can quickly and easily get you up and running, exactly as before the incident.

All-in-One BCDR for PCs

Whether it's because of a ransomware attack, lost or stolen device, or accidental deletion of a file, we can confidently offer a solution not only for the protection of endpoint business data on your Windows 7 and Windows 10 devices, but also for a streamlined recovery of the entire device configuration, setup and applications, including advanced PC virtualisation.

- Recover individual files and folders
- Rollback from ransomware attacks
- Restore lost or stolen PCs
- Virtualise PCs in the Datto Cloud

Reliable PC Backups

PCs move between networks or get powered off, making it difficult to get reliable backups. Datto Cloud Continuity for PCs backup automatically pauses when the device has its connection interrupted and then automatically resumes once the connection is restored. Screenshot Verification validates every backup and provides an alert if there are any issues—taking out the guesswork and ensuring reliable backups and recovery.

Simple Deployment and Management

The Datto Cloud Continuity agent sits on the protected PC and connects directly to the Datto Cloud without the need for a local appliance. We can easily manage and monitor Cloud Continuity for PCs and remotely virtualise PCs, perform file restores, pause and delete agents, and view the most recent screenshots.

One Price, One Terabyte, Zero Complications

For one simple price it protects the primary OS volume of an endpoint device up to 1 TB in size. No storage management is required, there are no surprise virtualisation or recovery charges, and backups are available with 1-year time-based retention (TBR) in the Datto Cloud.

Protect Business Data No Matter Where It Lives

Datto Cloud Continuity for PCs is part of Datto's entire Unified Continuity product line, which includes complete protection for servers and SaaS data. With Datto Cloud Continuity, we now have a powerful way to protect a broad range of PCs no matter where they operate from, delivering the highest levels of business uptime.

Datto Cloud Continuity for PCs

Key Features

- Image-based Cloud BCDR
- Automatic backup pause and resume
- Screenshot Verification
- Cloud Virtualisation
- File Restore
- Bare Metal Restore (BMR)
